Education

BSc (Hons) Computing - The British College (Leeds Beckett University)
Expected Graduation: 2027

Technical Skills

Languages: Python, Java, JavaScript, SQL, C++
Backend: FastAPI, Django, Node.js, Express.js, Apache Fineract
Frontend: React.js, HTML5, CSS3
Databases: PostgreSQL, MySQL, MongoDB
Tools & Technologies: Docker, Git, GitHub, REST APIs, Apache Tomcat
Testing: Selenium, PyTest
AI/ML: NLP, Text Classification, Feature Engineering, Model Evaluation

Projects

SMS Forwarding API Service

Python • FastAPI • REST APIs

- Built a secure SMS forwarding API that receives incoming messages and forwards them to configured endpoints.
 - Implemented rate limiting and request validation to prevent spam and API abuse.
 - Designed modular REST API endpoints for sending, receiving, and forwarding SMS data.
 - Implemented structured logging and JSON responses for monitoring and debugging.
-

Phishix - AI Scam Detection Platform

Python • NLP • FastAPI

- Developed a machine learning system to detect phishing and scam content from emails, URLs, and messages.
 - Applied NLP preprocessing, feature extraction, and classification models for scam detection.
 - Built FastAPI-based REST services enabling real-time scam analysis.
-

Experience

Full Stack Developer - Microfinance-based System

- Developed and customized a microfinance management system based on Apache Fineract/MifosX.
 - Designed PostgreSQL database schemas for financial and client management workflows.
 - Containerized backend services using Docker for deployment and development consistency.
 - Integrated REST APIs and supported fintech backend operations.
-

Achievements

- Harvard Health Hackathon – regional finalist
- Hult-Prize-2025 (2nd runner up) – regional
- Startup Hackathon (2025)
